Paper Code: SOC-401

Course Objectives

The main thrust of the course is to familiarize students with some of the foundational as well as critical questions as regards the 'problems' and 'prospects' of development. We begin with the way in which the contemporary 'discourse of development' takes off, with the Truman Design of 1949. The course then maps out the dynamics of development in terms of how it has been conceptualized by various development thinkers, how various Perspectives on development have given rise to newer ways of looking at the phenomenon as well as the processes of development (and underdevelopment) and follow it up with certain case studies taken from Asian, African and Latin American countries. Finally, we examine the case of the Indian economy and its development, growth, and poverty and analyze them in terms of different phases.

Subject Outcomes:

Having gone through such a course, students would not only be able to understand various complex and contentious issues of development and underdevelopment but will also be able to pursue professional careers as development academics, planners, managers, policymakers etc.

Paper: II : Economics of Development
Paper Code: MAE 302

Course Objectives:

CO1. This course introduces the students to the central issues of economic development in poor countries. It is observed that there are large differences in the material well-being between rich and poor countries, and further, this difference continues to grow over time. In addition to introducing the students to the relevant economic concepts and variables, this course will go through different theories that explain economic development and growth (or the lack of development and growth).

CO2. The key issue here is the large and ever-increasing income differential between rich and poor countries. Data will be presented that show these income differentials and how these evolve over time, and in addition, we will discuss theories that shed light on the causes of these. The course will also give an introduction to how different economic institutions and markets, (e.g., labor and credit markets), function in poor countries, and discuss the existence of certain economic mechanisms that reproduce and reinforce poverty - poverty traps.

Subject learning outcomes:

SO1. can explain inequalities between rich and poor countries, how the differences have evolved over time and how other measurements of quality of life correlates with per capita income. Can explain the concept of economic growth.

SO2. has knowledge of different measurements of poverty and inequality, and pros and cons of the different measurements. The student shall understand different characteristics of world demographics and explain how population growth affects other economic circumstances.

SO3. can explain the development of international trade patterns and central theories of international trade.

SO4. has knowledge of central multilateral humanitarian organizations' and their role.

Paper I: International Trade and Finance
Paper Code: MAE 401

Course Objectives

CO-1. International trade has played a very important role in the growth of global economy. It has enabled the countries to grow economically, adopt new technologies, and improve the overall economic welfare of their citizens.

CO-2. Although the motives behind economic activities of individuals and firms in the context of domestic and international transactions are the same, international trade introduces some new and different set of concerns.

CO-3. Even though trade between two countries benefits trading partners, it does not benefit all in each country. This has made the field subject of continuous economic and political debates. Economists, politicians, businesses, and labor unions hold strong and opposing views on several issues related to international trade.

CO-4. This course uses the same fundamental methods of analysis employed in other branches of economics to provide you with an analytical framework for the study of international trade and international finance.

CO-5. We will study why countries trade with each other, what are the gains from trade, debate on globalization, free trade agreements, the U.S. current account deficit, determinants of exchange rates, European integration, and the debate on global trade and financial institutions.

Subject Learning Outcomes:

SO-1. Identify the basic difference between inter-regional and international trade, understand how international trade has helped countries to acquire goods at cheaper cost and explain it through the various international trade theories.

SO-2. Show the benefits of international trade in a way how nations with strong international trade have become prosperous and have the power to control world economy and how global trade can be one of the major contributors of reducing poverty.
